MUD IN HANGER

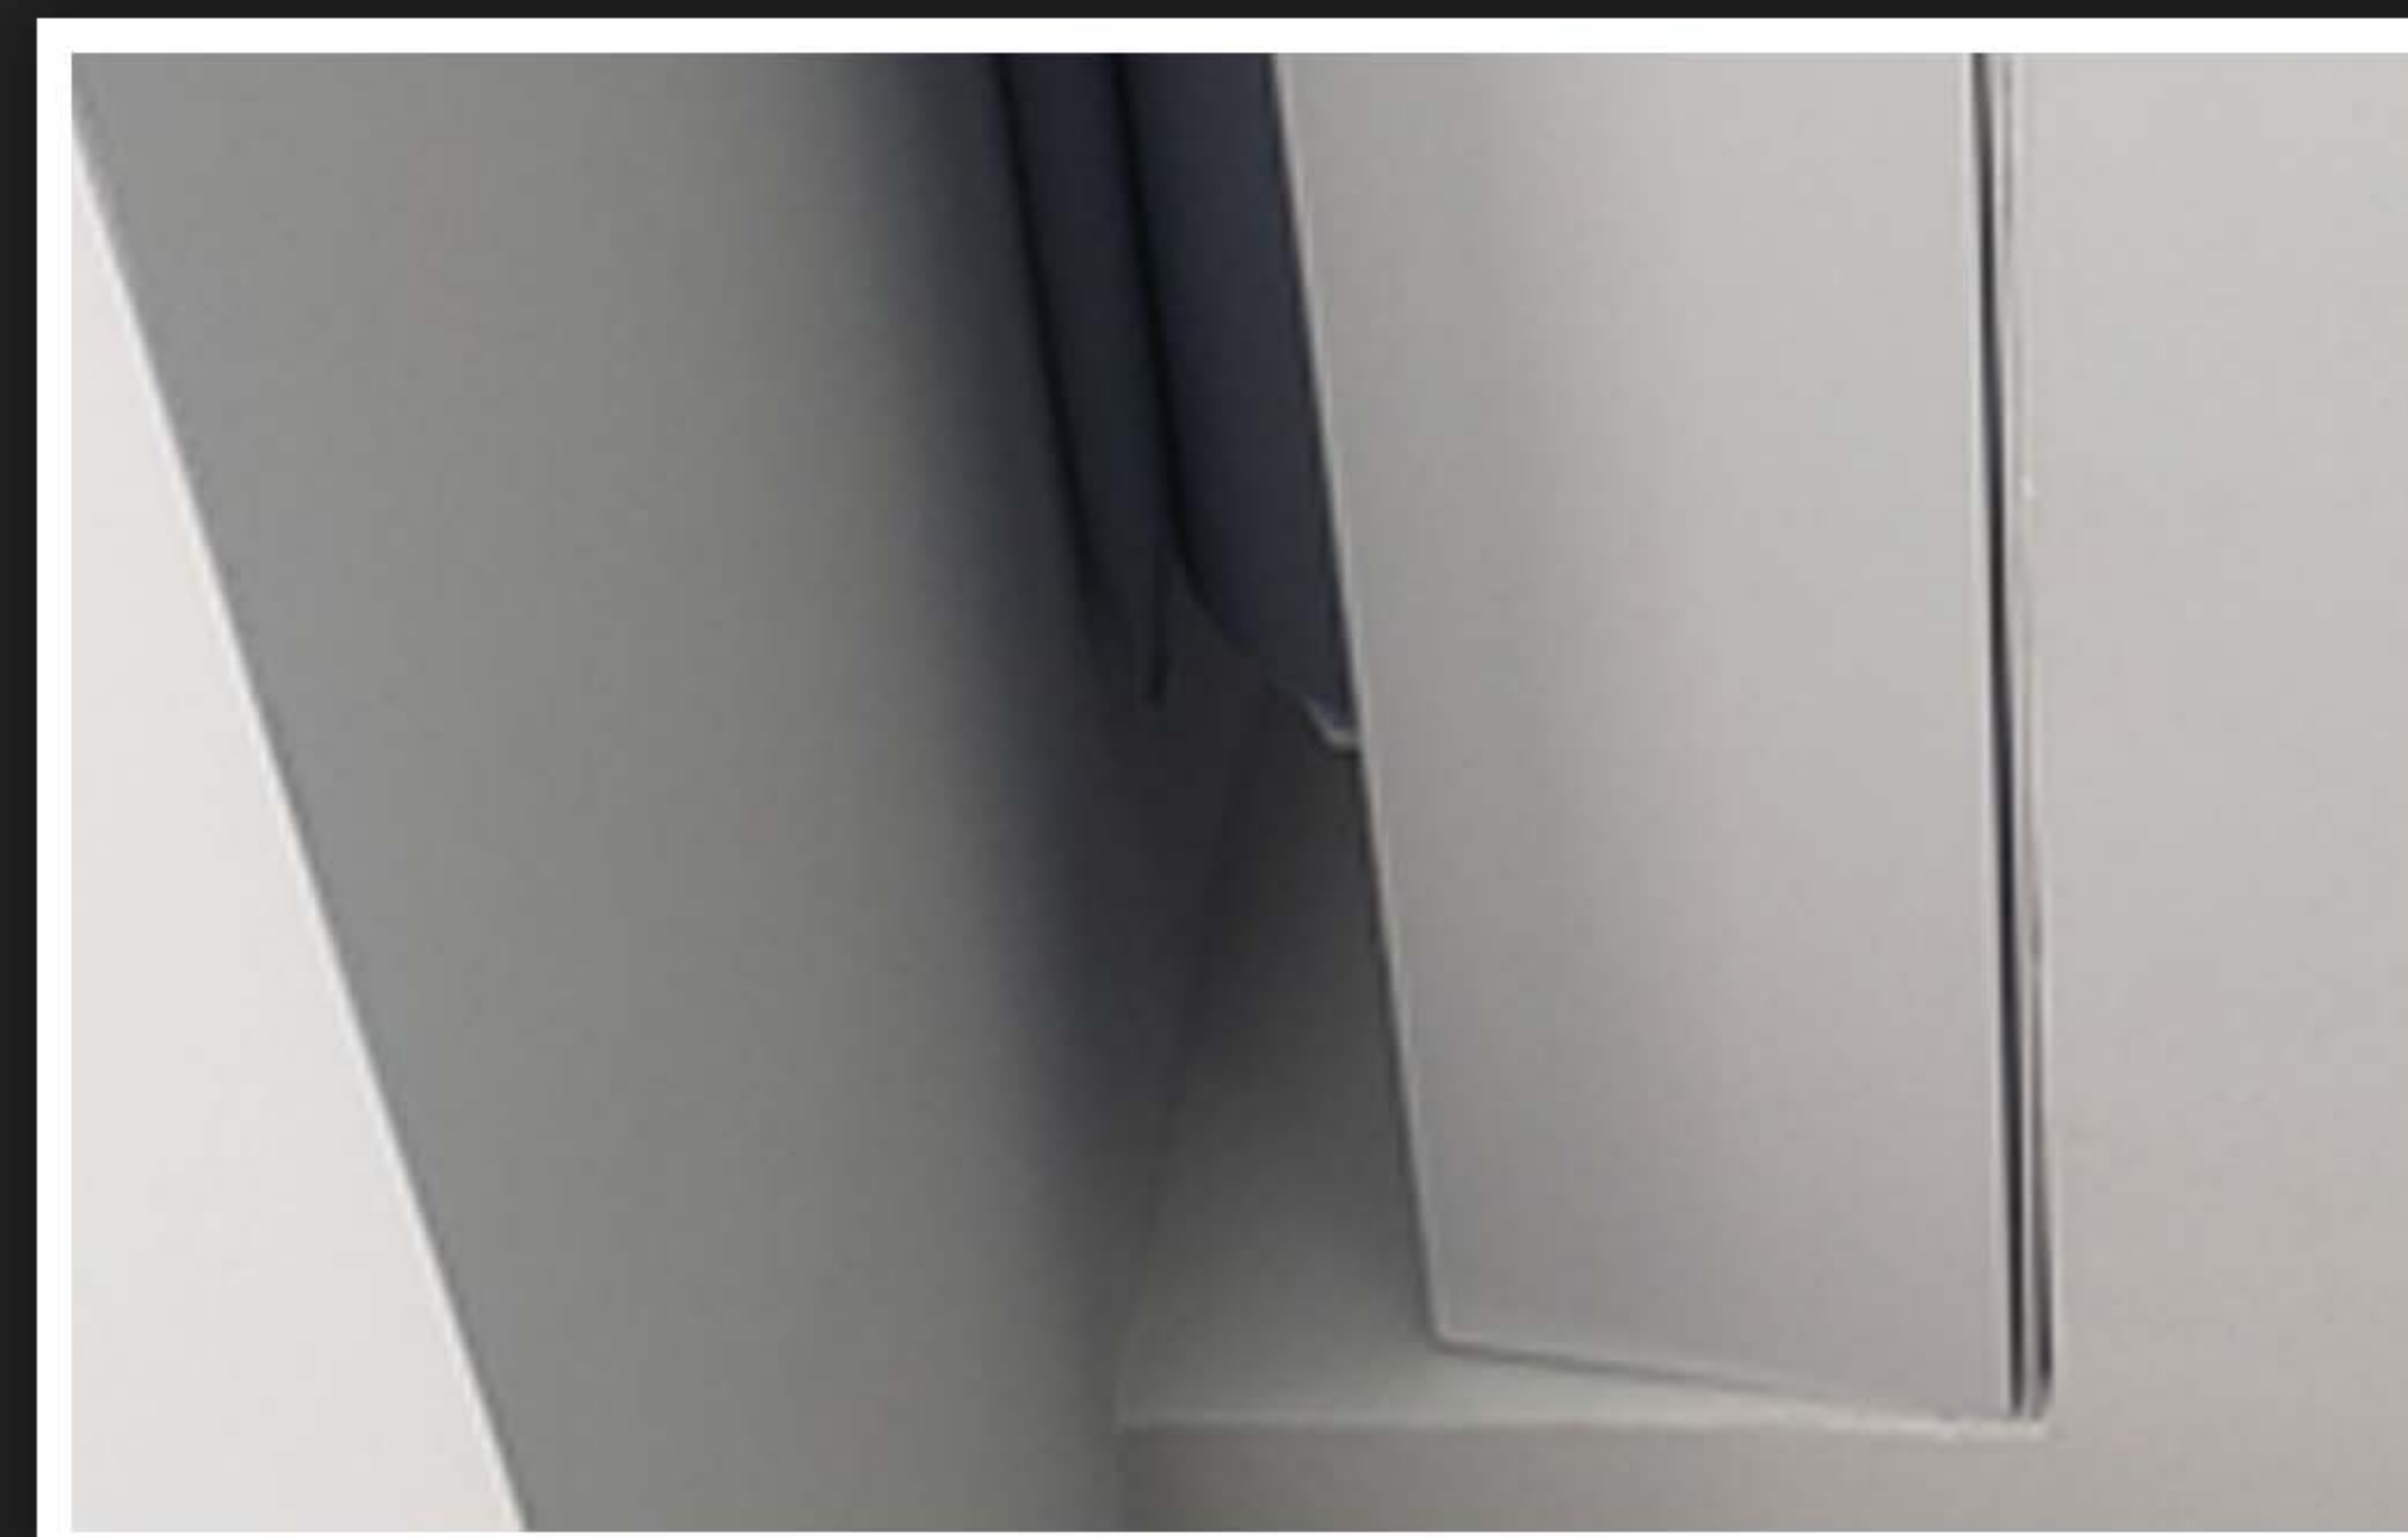

Typical Results Using Recessed Pocket or Standard Flap and Hanger

Double metal edge

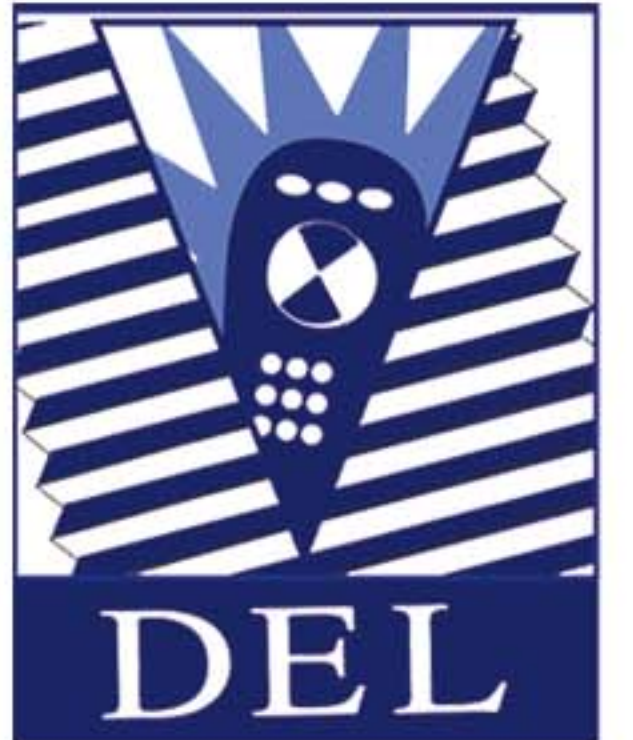

Uneven gaps from wavy drywall

Corners that are not square and level

Reduce Installation Time!

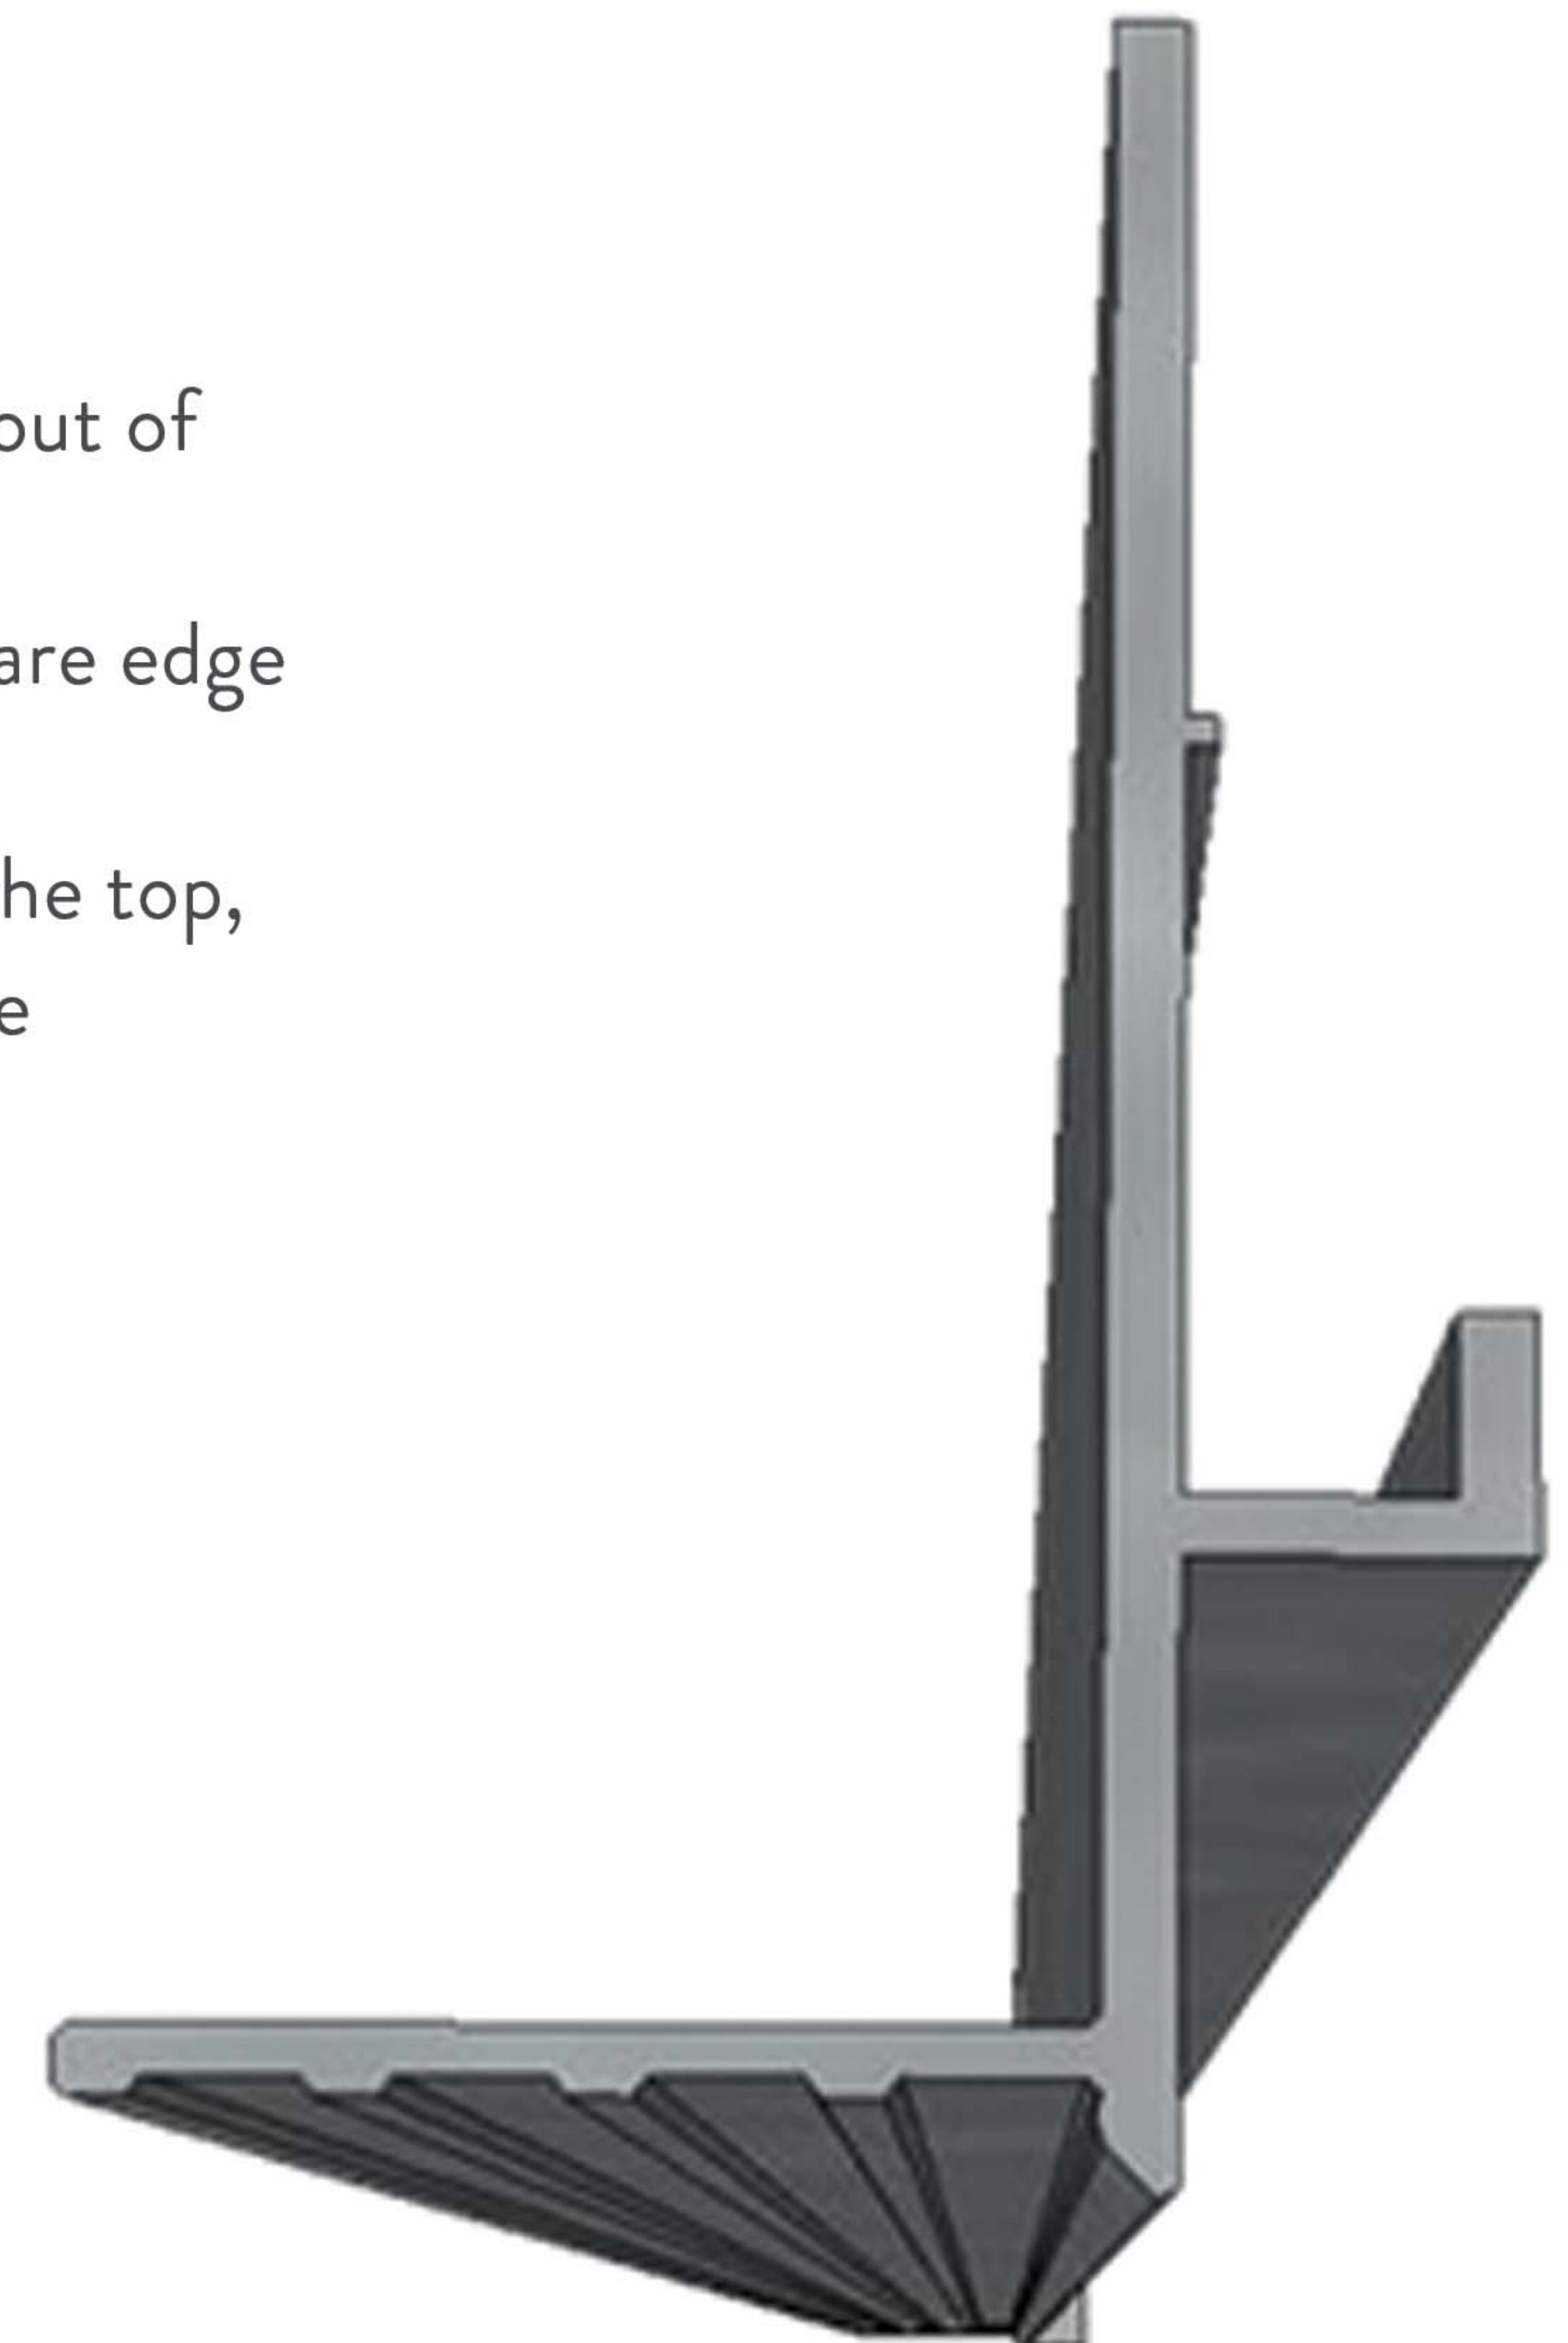

Introducing The DEL Motorized Solutions Perfect Fit Series Mud In Hanger (MIH)!

- You are guaranteed to have the proper depth using the Perfect Fit MIH corners
- No leveling of hanger
 - The hanger is installed during construction. Simply hook on the flap
- No more mitering or feathering of the flap at the corners to compensate for out of square cavities
 - By using the Perfect Fit MIH corner, you are guaranteed a perfectly square edge
- By having the builder construct the cavity with solid plywood or MDF along the top, simple wood screws can be used to anchor the shade brackets, eliminating the possibility of blocking not being in place

Various sizes available

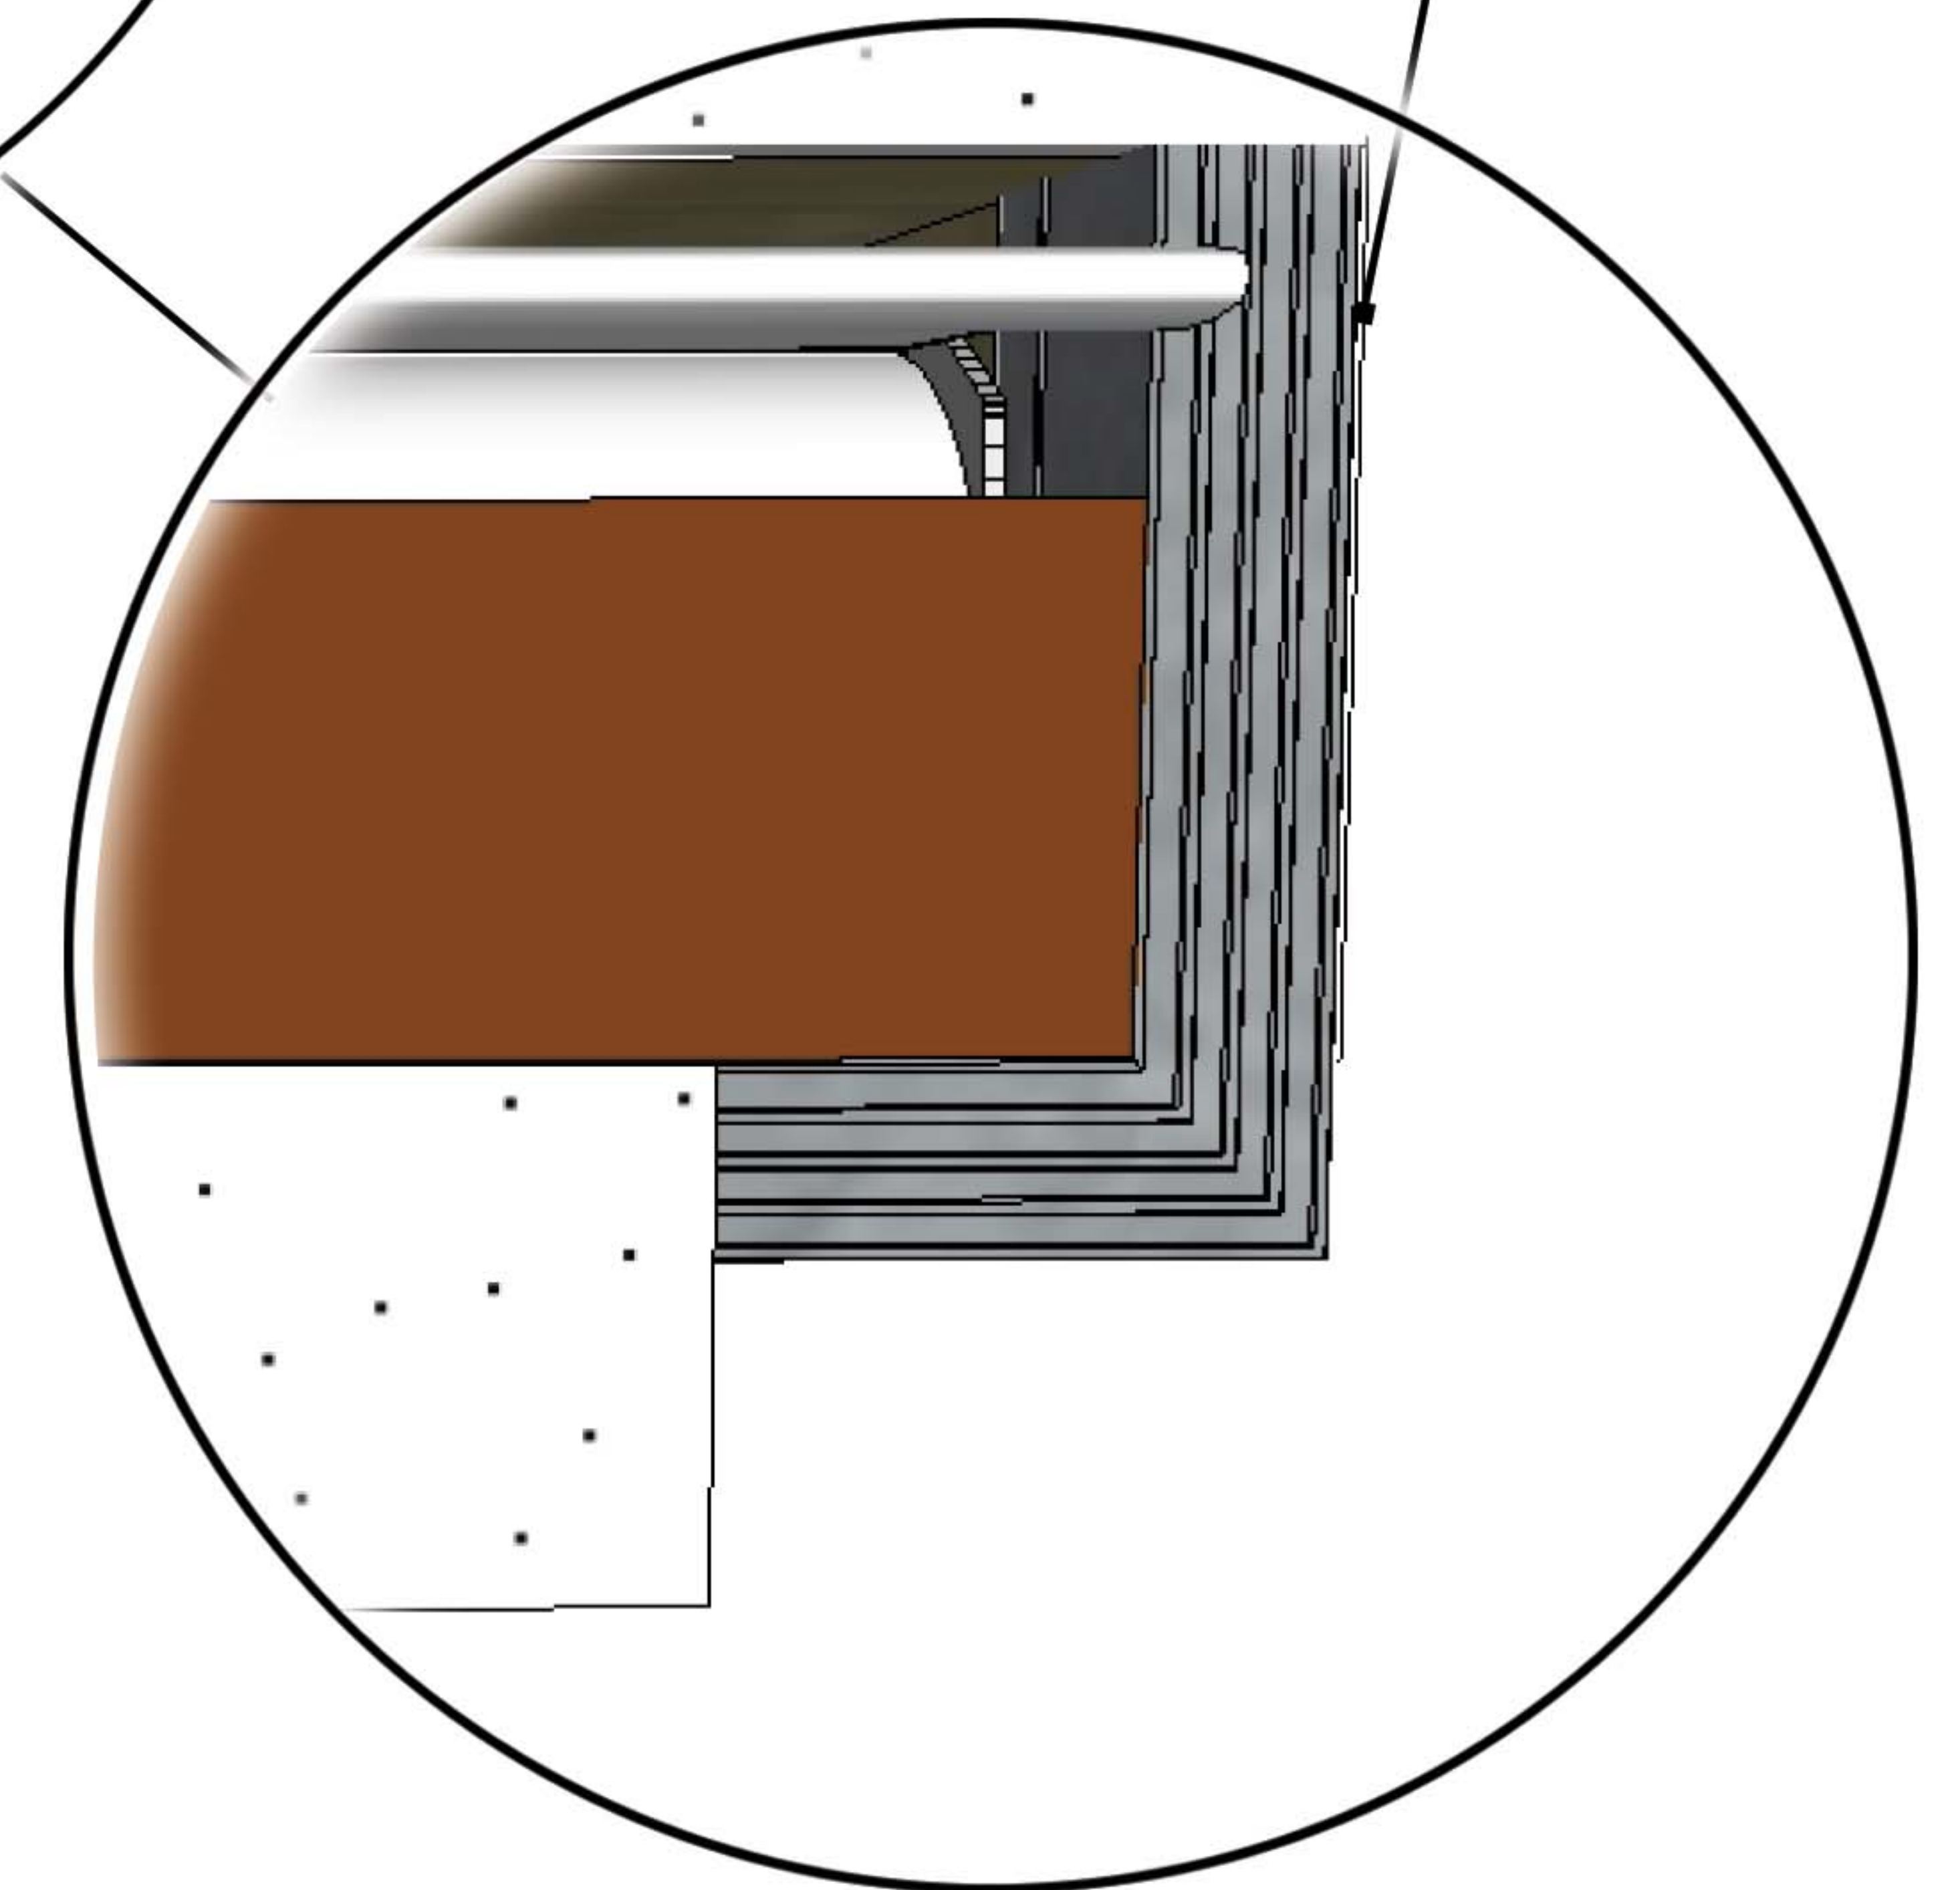

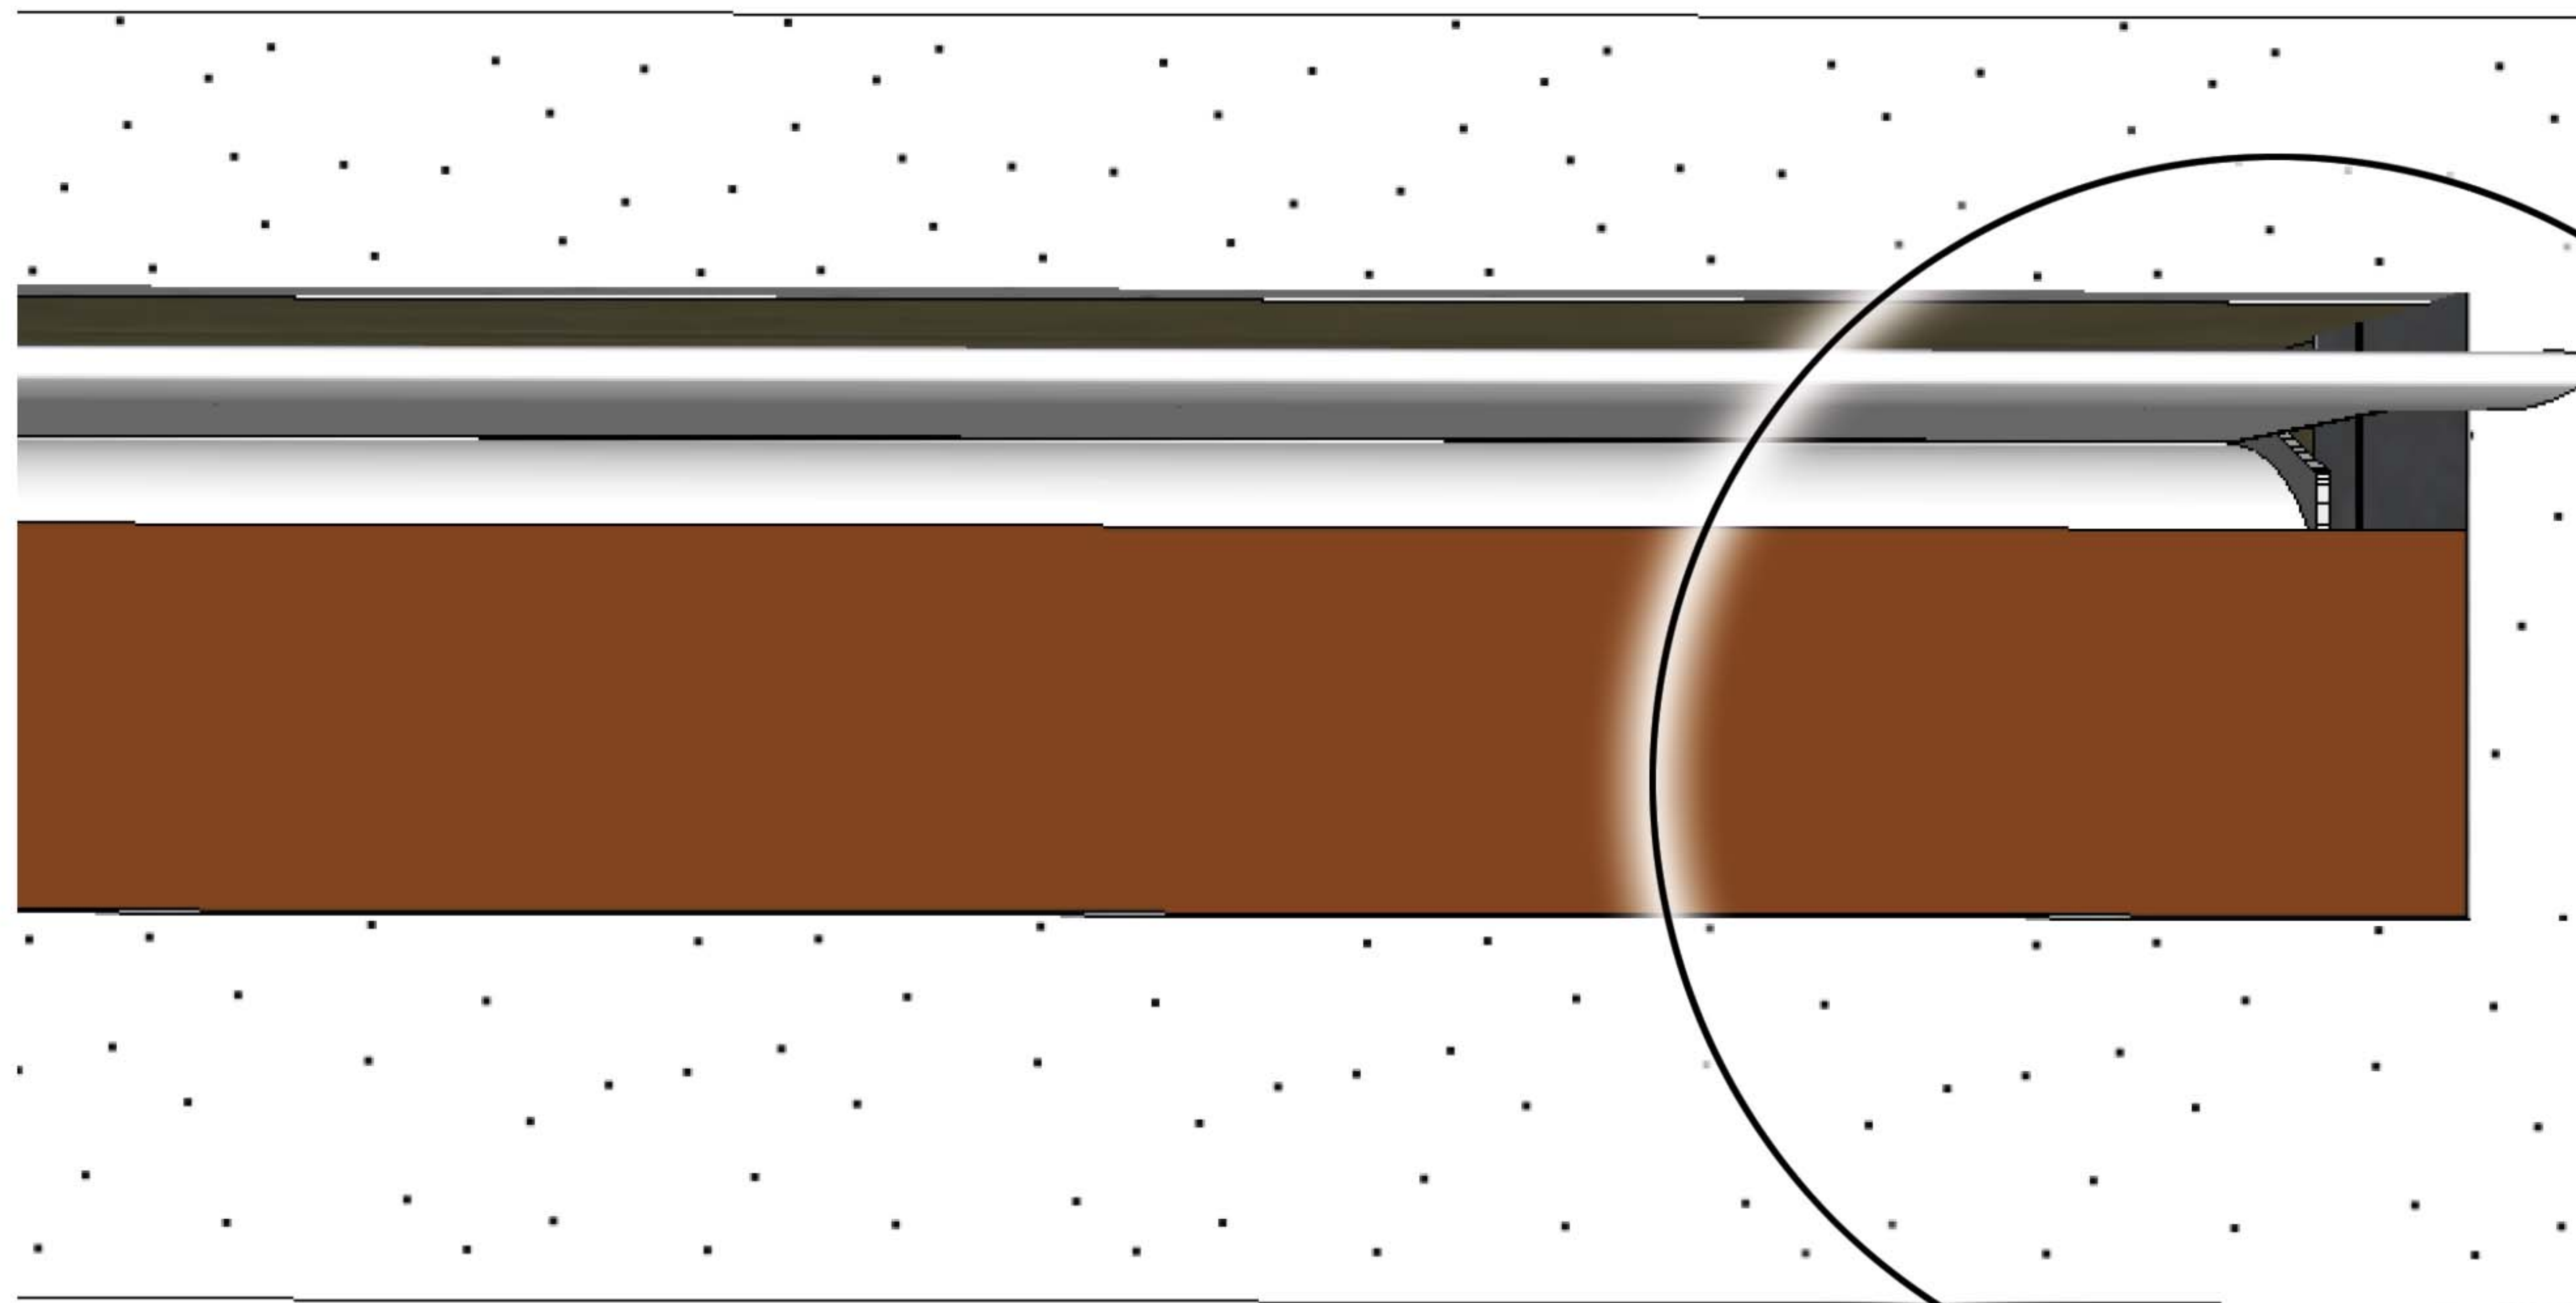

- MIH connects together to seamlessly form any width.
- The hanger is designed for Lutron 2", 3", and 5" flap
- The corners are available in 3.5", 4.75", 6", and 7" depths (custom sizes are available upon request)
