## **IR and Radio Transmitters**

- Transmitters are a simple and efficient method to deliver a hand held remote control solution for multiple motors.
- T24A-Pdual sends both IR and RF commands simultaneously. This feature allows for control of motors within a project to be operated with either IR or RF while only having to use a single transmitter. This technology could be utilized when motors are added to an existing IR system and the only control that can be useful is RF.
- T24A-Pdual is an operating and a programming device. It can program motor controls operational features to their full potential, and motor addresses up to channel 24.
- Should a project have fewer than 24 motors, the unused channels could be programmed as Sub Groups, making a T24A-Pdual a clean and simple solution for almost any projects.

*Showroom:*  
2075 Byberry Road  
The Atrium, Suite 108  
Bensalem, PA 19020

*Factory:*  
111 Buck Road  
Unit #900  
Huntingdon Valley, PA 19006
