

Luxury Portfolio

Welcome to the Art of Effortless

For more than 60 years, the same core belief has guided Lutron — that innovative design and the transformative nature of light have the power to enrich people's lives. The Lutron luxury portfolio is the purest expression of that belief.

The Experience

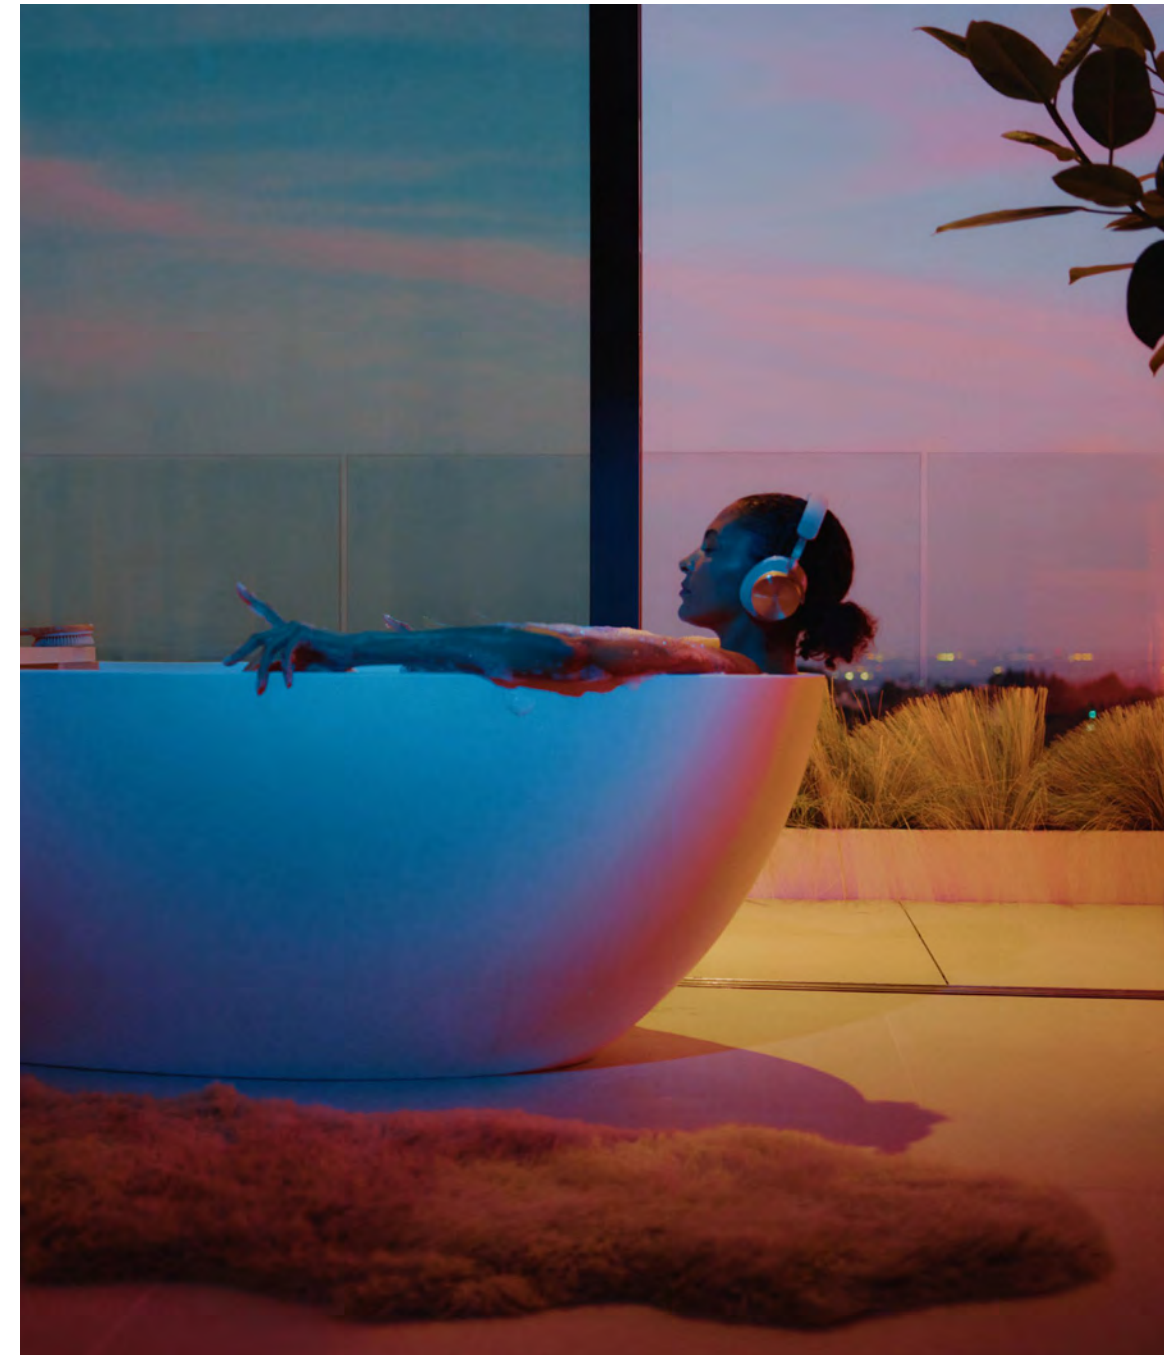

Captivating Beauty

Next-generation lighting. Hand-crafted controls.
Reinvent how light in the home should feel.

Product: Ketra Lighting with Alisse Keypads | Residence: East Hampton, New York

Bespoke Experiences

Reflect your style with experiences as unique as you are. Personalize lighting, window treatments, and controls to complement the home and the life you live in it.

Intuitive Interactions

Designed with life in mind. Stay connected to your home with controls that feel natural, responsive, and simple to use.

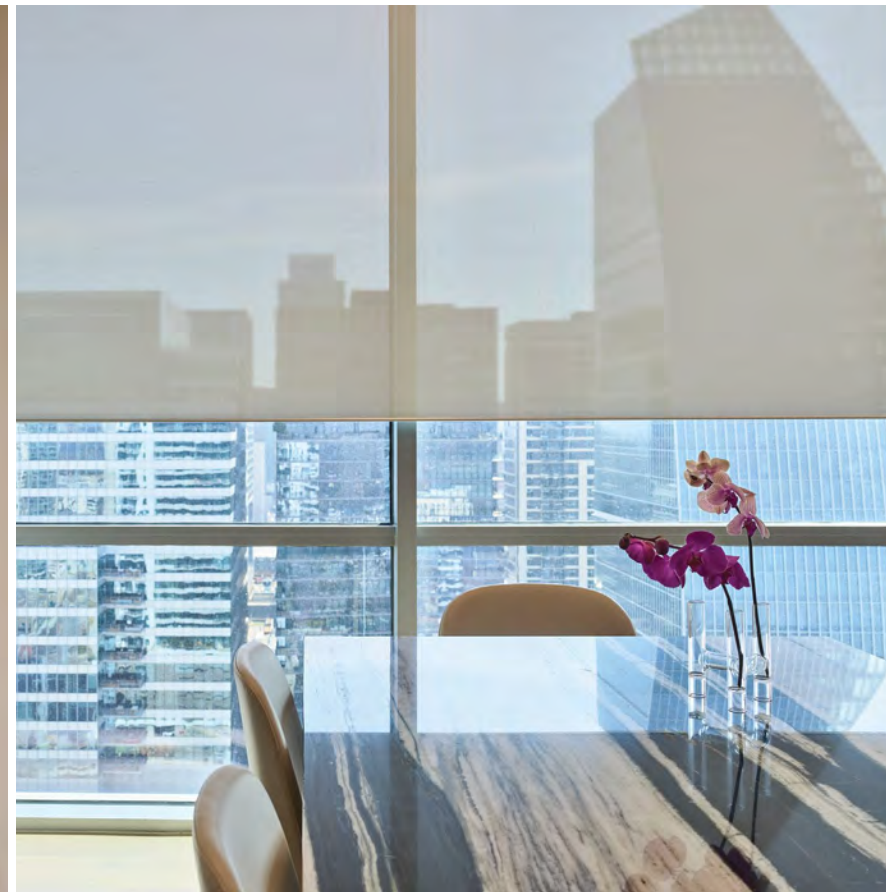

Product: Palladiom Shades and Lutron App | Residence: Sag Harbor, New York

The Elements

Seamless, precise, and hand-crafted: This is your home tailored and connected to form a system that's far more powerful than the sum of its parts.

Intelligent Lighting

The Future of Light in the Built Environment

Beautiful light meets unprecedented control. Lutron Intelligent Lighting is designed and engineered from the beginning to work seamlessly with Lutron's most advanced control systems for next-gen performance, granular control, and superior reliability.

The result is a suite of lamps and luminaires that deliver precise and effortless control over color and intensity in a way only Lutron can.

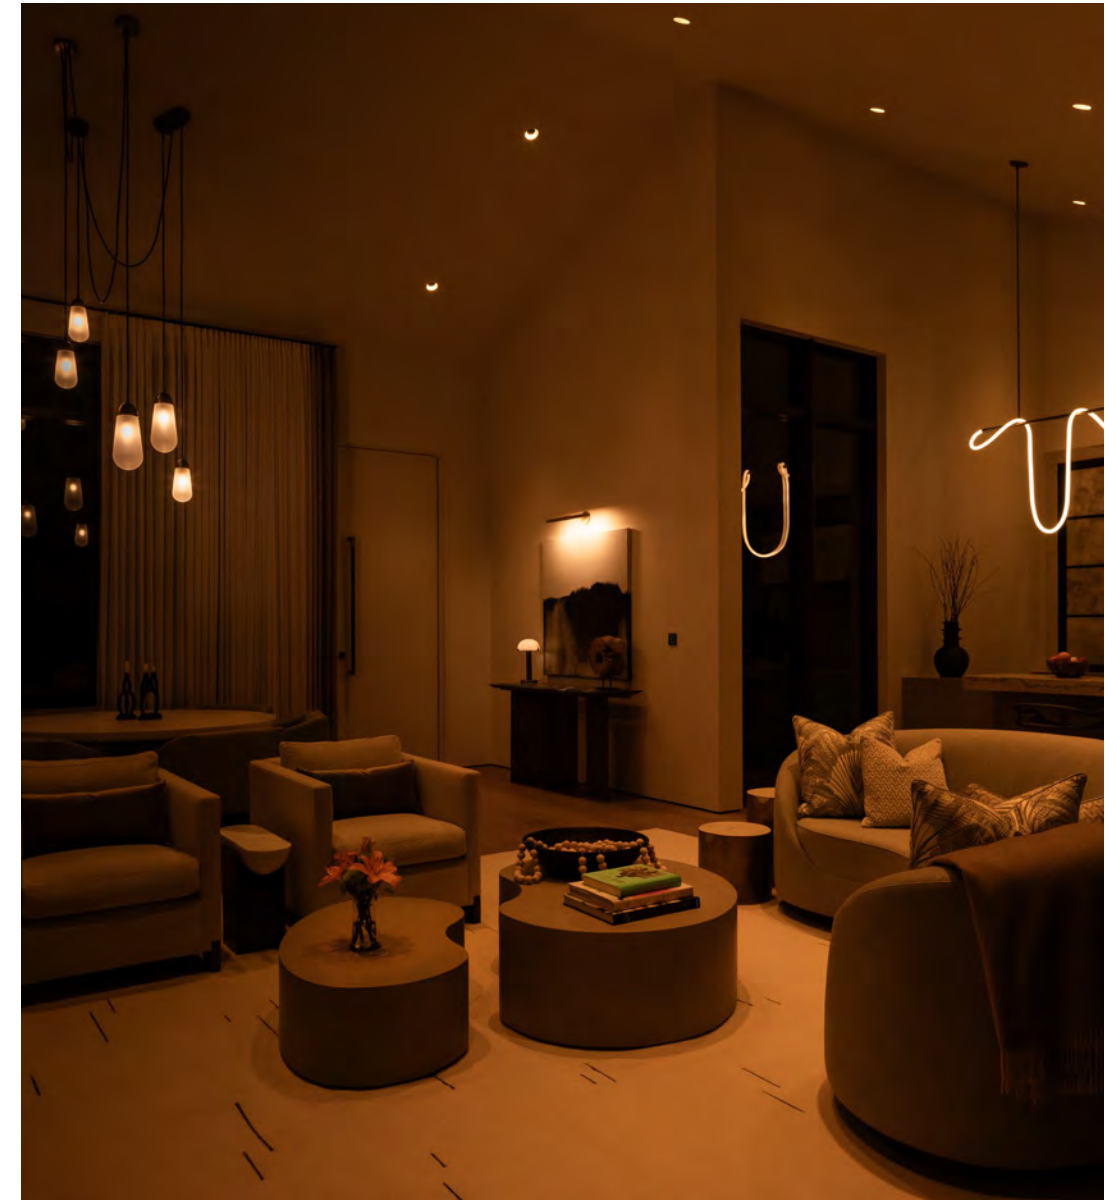

Midday

Evening

Night

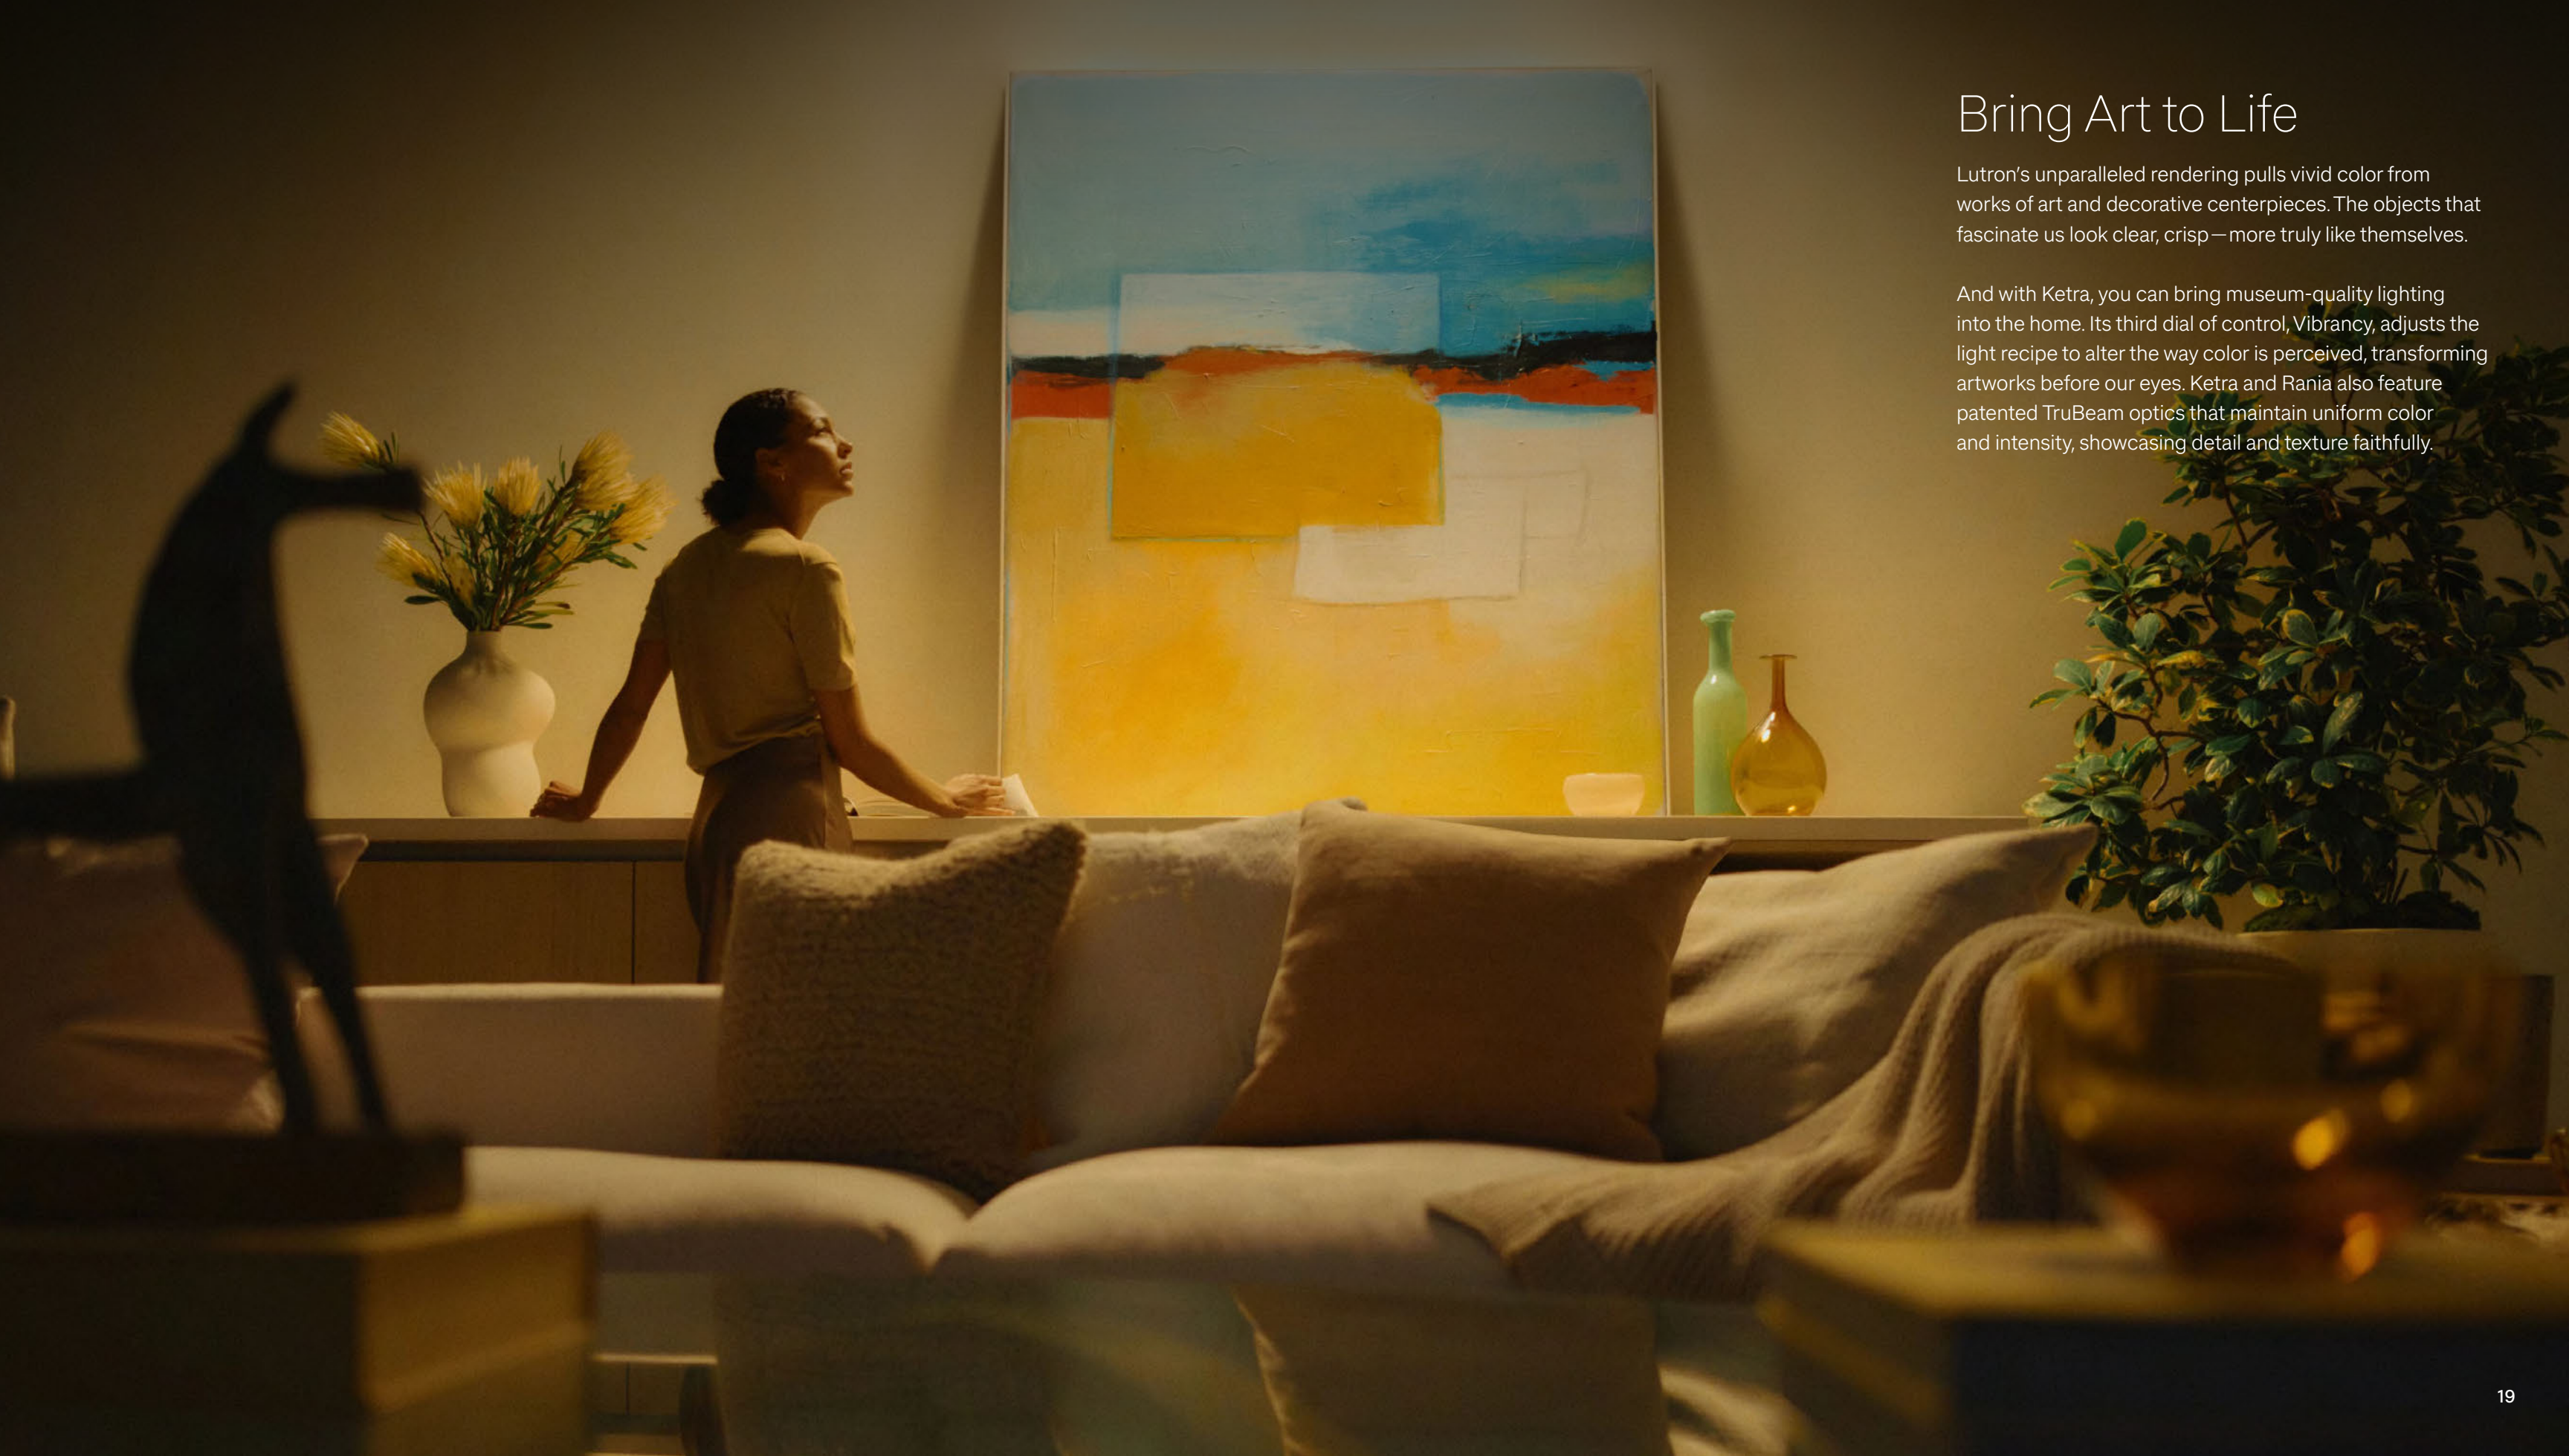

Sunrise to Sunset

From the amber glow of firelight to crisp arctic sun, Lutron Intelligent Lighting provides a broad range of rich, natural-feeling light so you can match every moment to its mood.

Ketra and Rania take this capacity even further, with an expansive CCT range and breakthrough color mixing that produces the industry's most true-to-nature electric light.

Sync with Nature

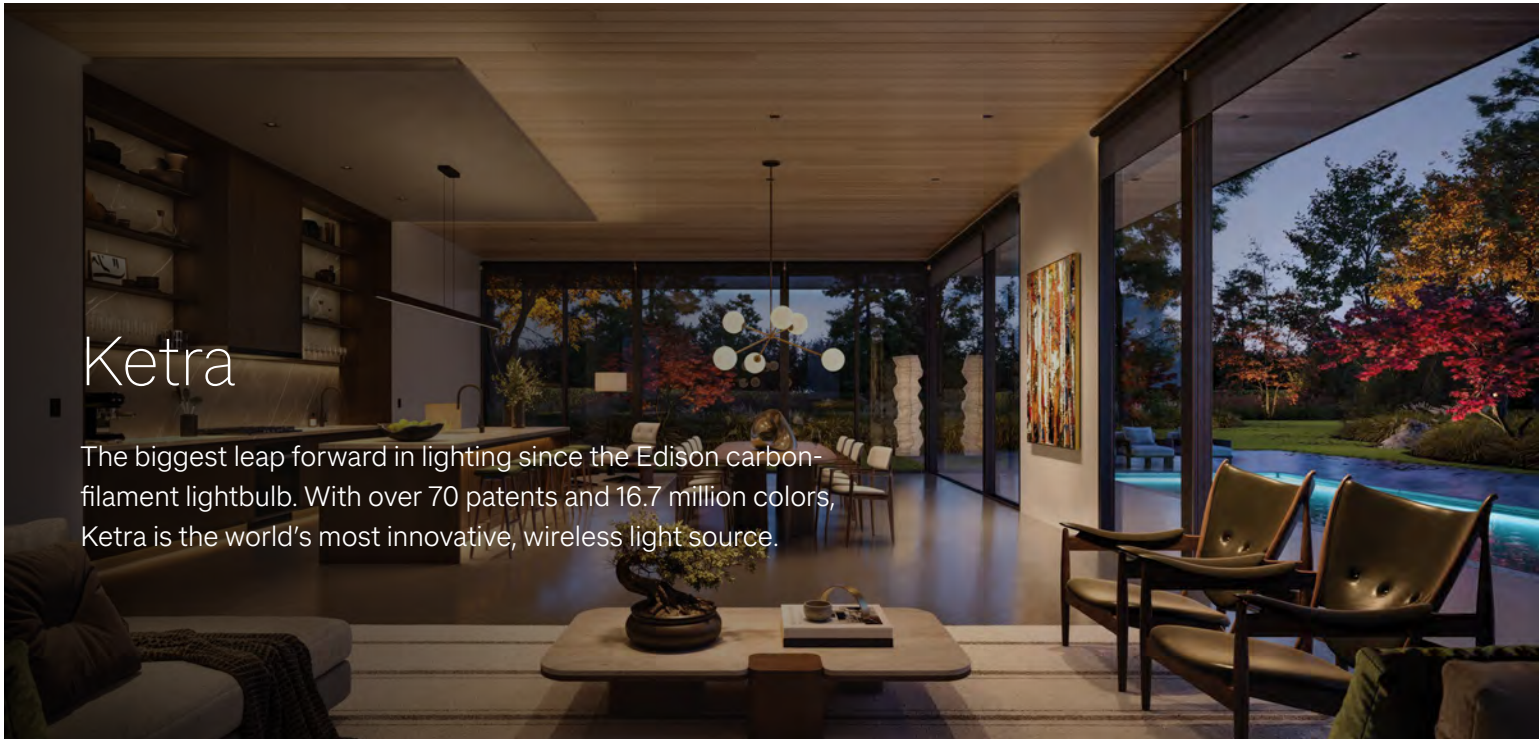

With Natural Show, light shifts alongside the sun throughout the day, dissolving the boundaries between indoors and out. Intelligent Lighting works with Lutron's location-aware controls to mimic sunlight, gradually adjusting color and brightness so people feel more connected to the outdoors and the natural rhythms of the day.

Bring Art to Life

Lutron's unparalleled rendering pulls vivid color from works of art and decorative centerpieces. The objects that fascinate us look clear, crisp — more truly like themselves.

And with Ketra, you can bring museum-quality lighting into the home. Its third dial of control, Vibrancy, adjusts the light recipe to alter the way color is perceived, transforming artworks before our eyes. Ketra and Rania also feature patented TruBeam optics that maintain uniform color and intensity, showcasing detail and texture faithfully.

Ketra

The biggest leap forward in lighting since the Edison carbon-filament lightbulb. With over 70 patents and 16.7 million colors, Ketra is the world's most innovative, wireless light source.

Window Treatments

Tailored. Precise. Daylight Control.

Like a dimmer for the sun. Lutron automated window treatments are an integral part of the light control system, weaving whisper-quiet privacy, protection, and the choice between hundreds of premium textiles into the Lutron luxury portfolio.

Intelligent Hembar Alignment

When in motion, Lutron shades monitor their hembar alignment over a hundred times a second to ensure shades raise and lower in calm unison.

Product: Palladiom Shades | Clear Anodized

Whisper Quiet

Lutron designs each drive and curates each textile to be as quiet as possible, measuring the shade movement down to a fraction of a decibel to ensure it's as quiet as a whisper.

Product: Palladiom Shades | Satin Nickel

Beautiful Privacy

Cut glare and personalize privacy. Choose from hundreds of woven textiles designed to help you strike a balance between connection to the world and sanctuary from it.

Artful Engineering

Authentic materials. Hand-finished detailing. Breakthrough engineering. With the quiet, automated window treatment, Lutron established an entirely new category, combining groundbreaking technology, such as Intelligent Hembar Alignment, with refined style in a way only Lutron could.

Controls

Time-Honored Craftsmanship

Crafted with authentic materials that bear the marks of artisanship. Each design decision is made not from the inside out to achieve a technical purpose, but from the outside in to ensure each control is beautiful, intuitive, and a pleasure to use.

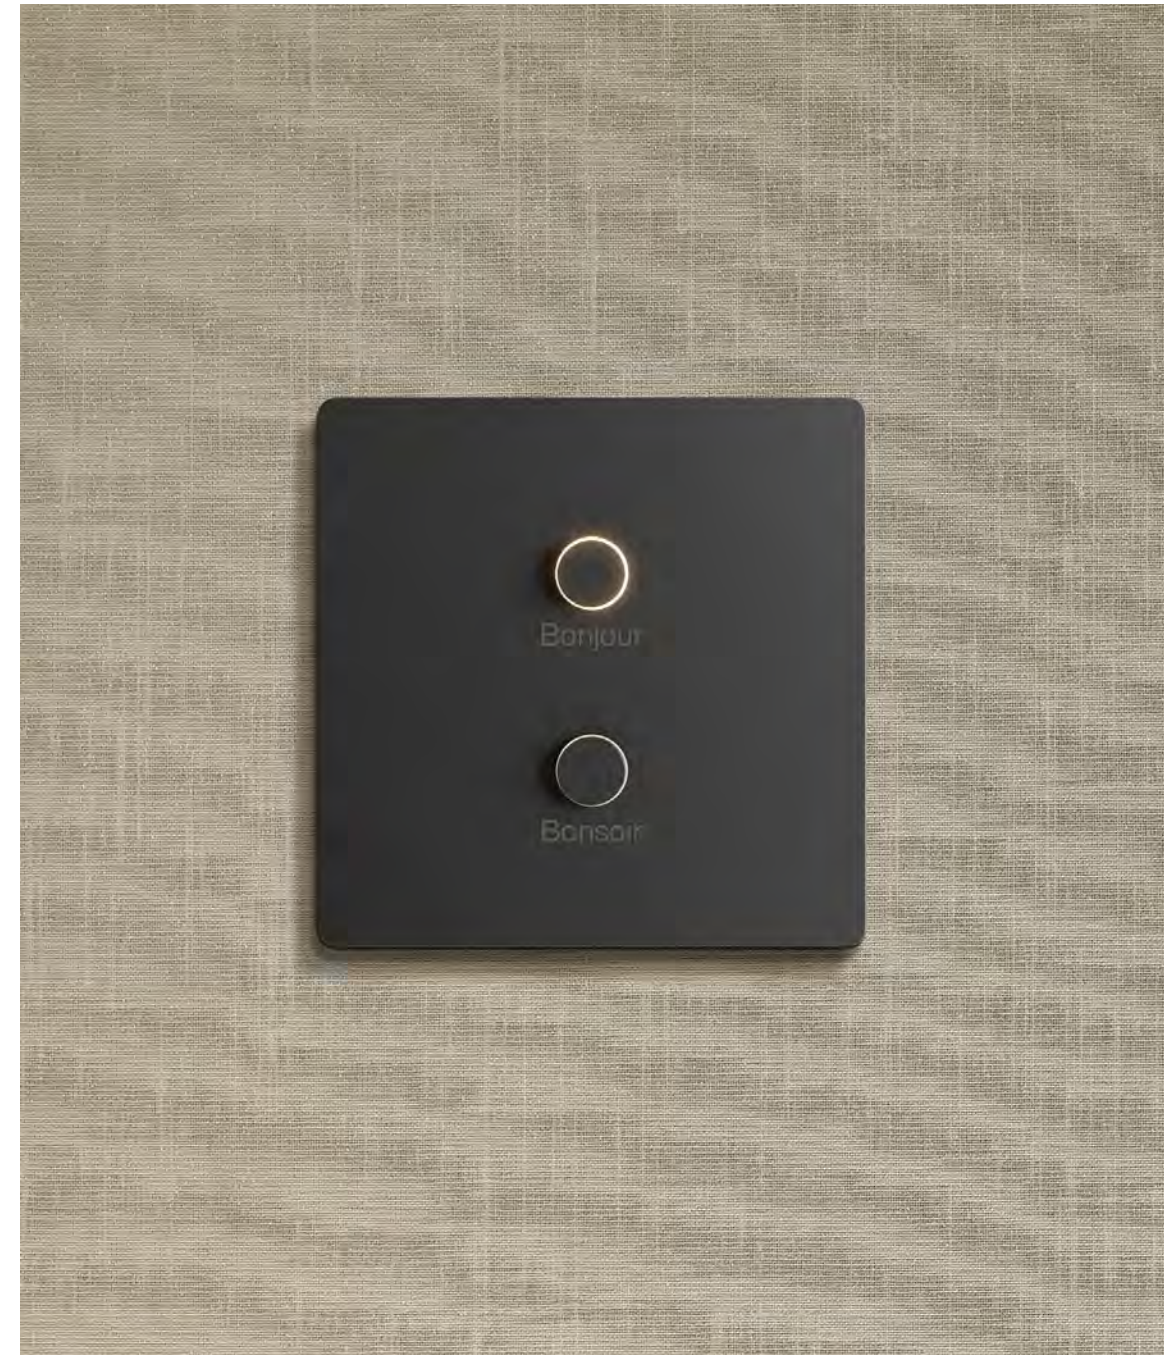

Personal by Design

Custom button engraving makes instant home control second nature, not just for you but also for your guests.

Product: Alisse Keypad | Champagne

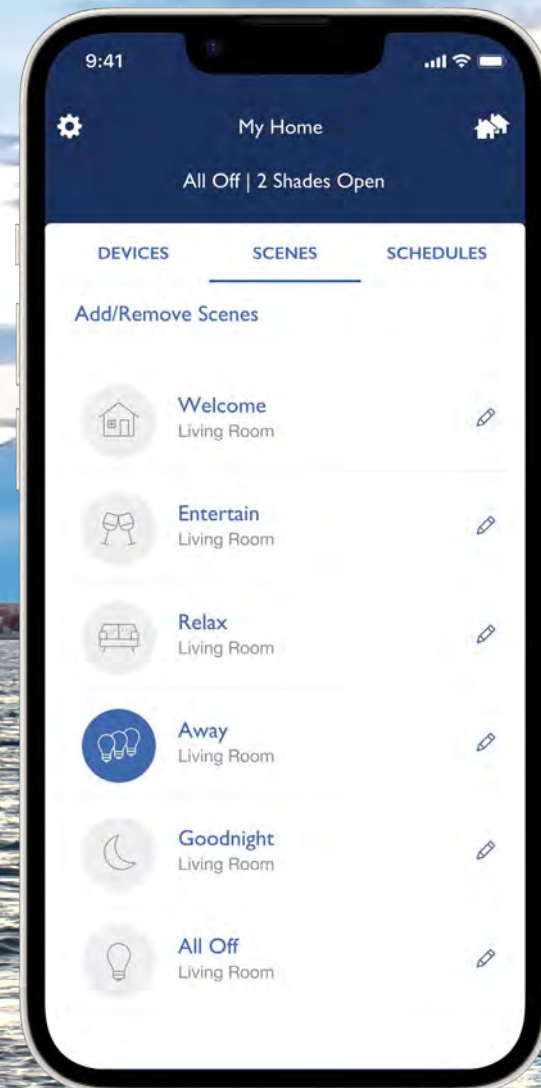

Simple by Design

Keypads make room and whole-home control effortless. Each button is custom engraved and programmed, so common commands are fingertip-accessible throughout your home.

Product: Alisse Keypad | Graphite

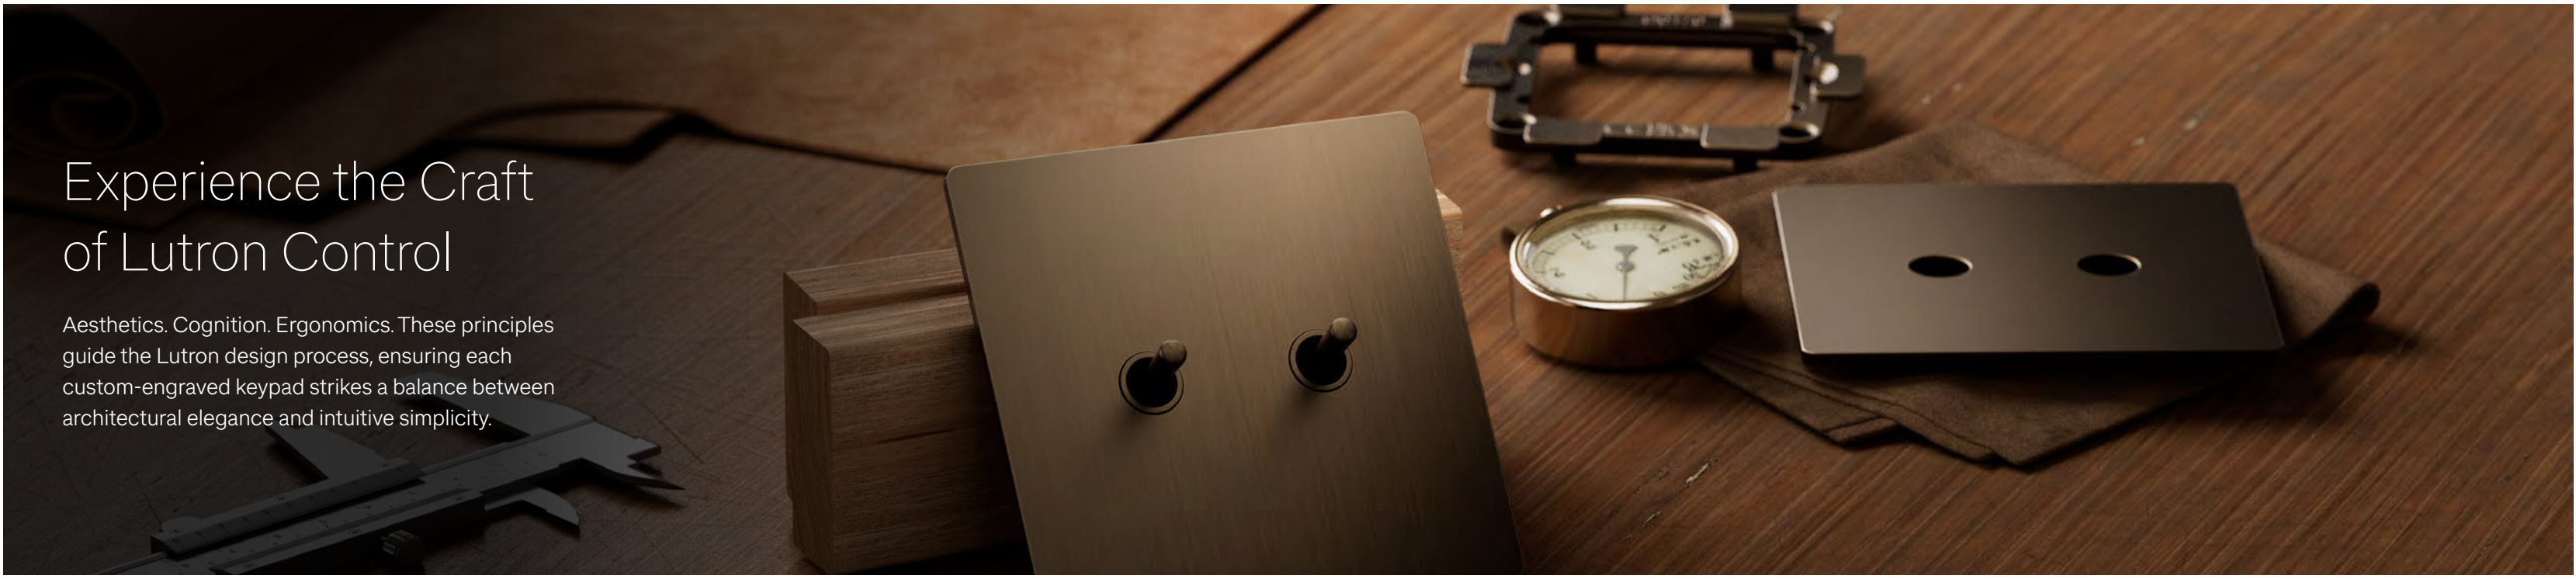

Control From Anywhere

Immediate access to personalized light, window treatments, and climate control, whether you're lounging in the living room or sipping sunset cocktails in the harbor. The Lutron app puts whole-home control in the palm of your hand.

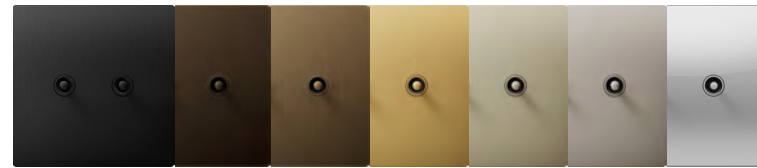

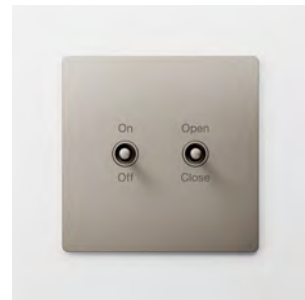

Experience the Craft of Lutron Control

Aesthetics. Cognition. Ergonomics. These principles guide the Lutron design process, ensuring each custom-engraved keypad strikes a balance between architectural elegance and intuitive simplicity.

Integration

Advanced Connection

Security, climate control, A/V, home automation, voice — tying these components to the portfolio is what makes a smart, luxury home truly intelligent. And with Lutron's latest technologies, these third-party integrations have never been more responsive, reliable, or secure.

Home Theater

Remake any room into an immersive home cinema. Queue up a film, tune the room's lighting, and close the drapery with the push of a button.

Security

"Vacation Mode" adds to the home security system by dimming lights and adjusting window treatments in a sequence automatically created to mimic your day-to-day habits.

Voice Control

The most natural way to control the home. Voice allows anyone in the room to control lights, window treatments, climate, and any other connected device.

Product: Palladiom with Josh AI

Climate Control

Craft your comfort. Control heating, cooling, and fans via Lutron thermostats, keypads, timeclocks, and the Lutron app.

Product: Palladiom Climate Control and Keypad

Enjoy the Luxury of Seamless Integration

Unlock the full potential of the intelligent home. The Lutron luxury portfolio serves as the ultimate smarthome foundation. A/V, security, climate, voice assistants — nearly anything you can imagine. Your Lutron custom integrator will seamlessly connect each part of the portfolio to be responsive, reliable, and secure.

The Lutron Difference

Design-driven. People-centered. For over six decades, Lutron has been redefining the role light plays in our lives.

Heritage

Since the beginning, Lutron's in-house design and engineering have been rooted in the same core principles. The consistency of our designs reflects the consistency of those principles. Aesthetics, Cognition, Ergonomics.

Quality

With thousands of patents to build on, the latest generation of the Lutron luxury portfolio brings together best-in-class dimming technology, automated window treatments, and next-generation lighting fixtures to set a new standard for whole-home control.

Service

Quality and reliability are what we make. That's why each component comes with an extensive warranty and the backing of industry-best 24/7 technical support.

Experience Centers

Immerse yourself in the ultimate whole-home control experience. Lutron lighting experts demonstrate the benefits of integrated lighting, window treatments, and control in a setting designed to inspire. Schedule a consultation at a Lutron experience center today.
