### **Perfect Fit Drapery Track Cavity Instructions**

Congratulations on your purchase of a specialty system from DEL Motorized Solutions. If you have any questions, please call technical support at 1-866-446-6867 or email us at <a href="mailto:info@motorizedsolutions.com">info@motorizedsolutions.com</a>

## STOP Important Notes - Please Read Before Installing STOP

### **CAUTION: RISK OF FALLING OBJECTS**

Securely install the system per the mounting instructions. Failure to do so could result in injury.

All mounting surfaces must be level.

Perfect Fit and hardware are to be anchored into wood blocking. If wood blocking is not available, you must use appropriate fasteners (not included) to support the weight of the system and load.

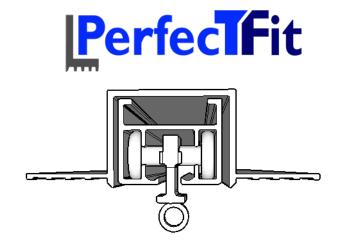

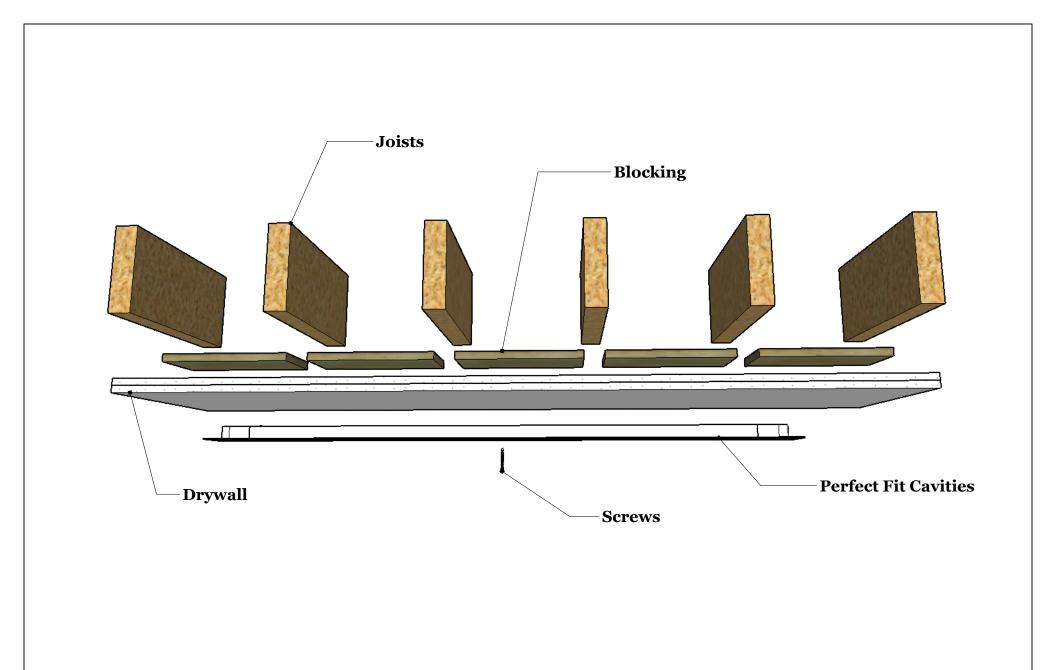

Pre-drill all holes with the appropriate size bit.

### **TOOLS REQUIRED**

Pencil, Tape Measure, Powered Screwdriver, Drill, Level, Rasp, Drill bits.

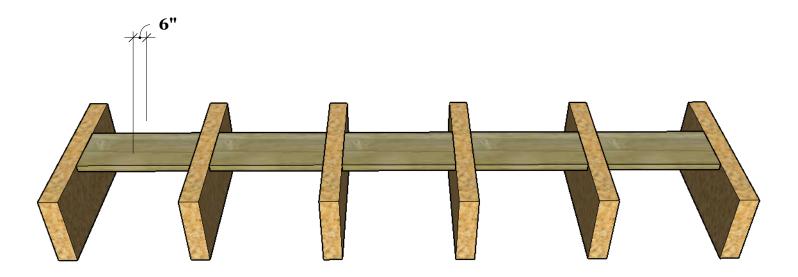

## **Step 1 - Blocking**

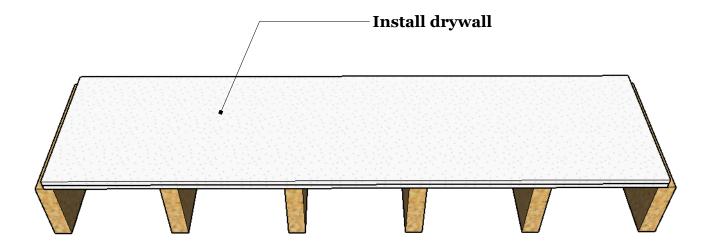

Insert blocking between the joists. Blocking and anchors to be strong enough to support the weight of the Perfect Fit cavity, the drapery track, and the drapery.

## Step 2 - Drywall

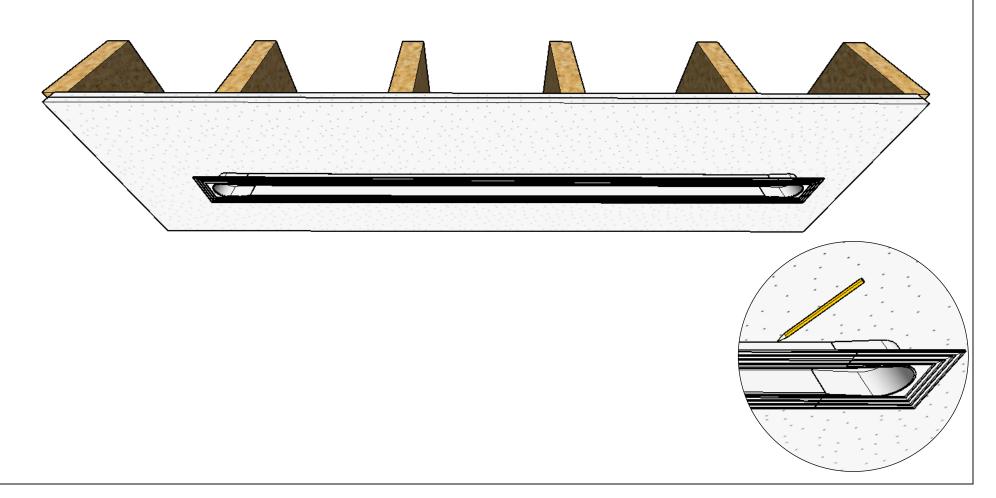

Install the drywall over the joists.

## **Step 3 - Tracing The Profile**

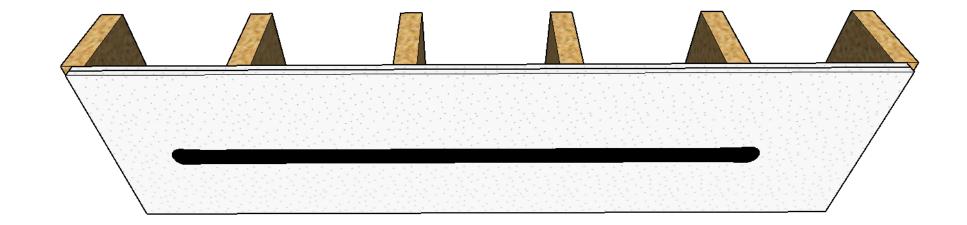

Place the Perfect Fit cavity on the ceiling. Use temporary screws to tack it in place. Trace the profile using a pencil. Refer to your drapery workroom and or track manufacturer's specifications for stack and clearance requirements.

## **Step 4 - Cutting The Hole**

Cut the drywall at the traced line.

# Step 5 Option 1 When mudding use a 10" trowel. Mud flang placed on top of drywall.

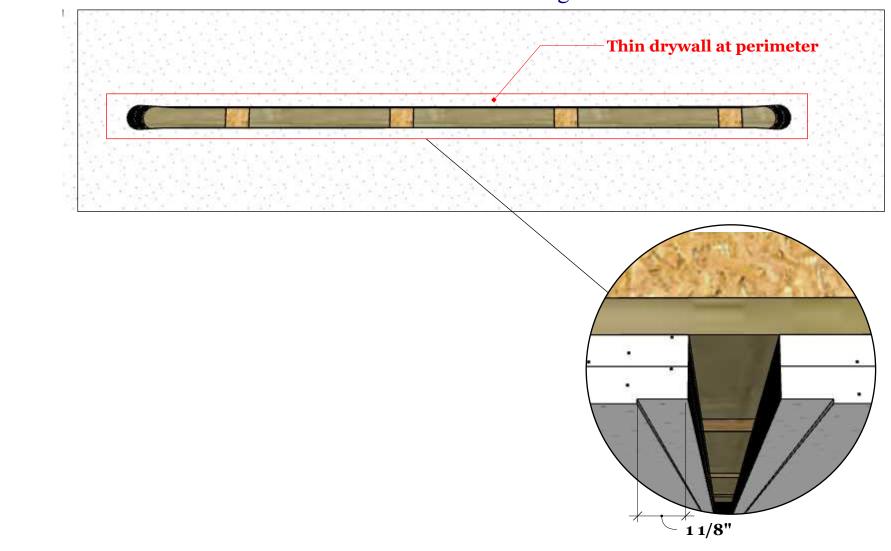

## Step 5 Option 2 Blocking spaced along length Drywall butt to mud flange. to support mud flanges. Flange level with drywall plane.

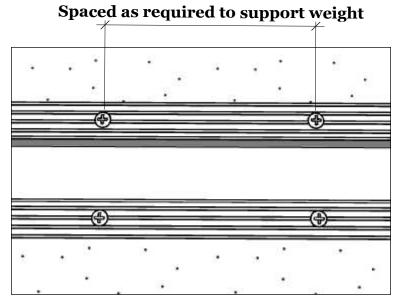

## **Step 5 - Thin The Edges**

Thin the drywall in the area to receive the Perfect Fit Cavity so that the mud flanges will be flush with the ceiling once mud in.

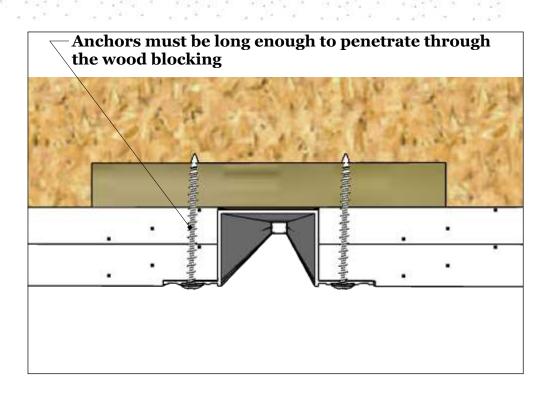

# Drill holes and insert screw anchors Insert Perfect Fit in hole

Note: To avoid risk of cracking or warping the motor and idle ends, do not over tighten the screws.

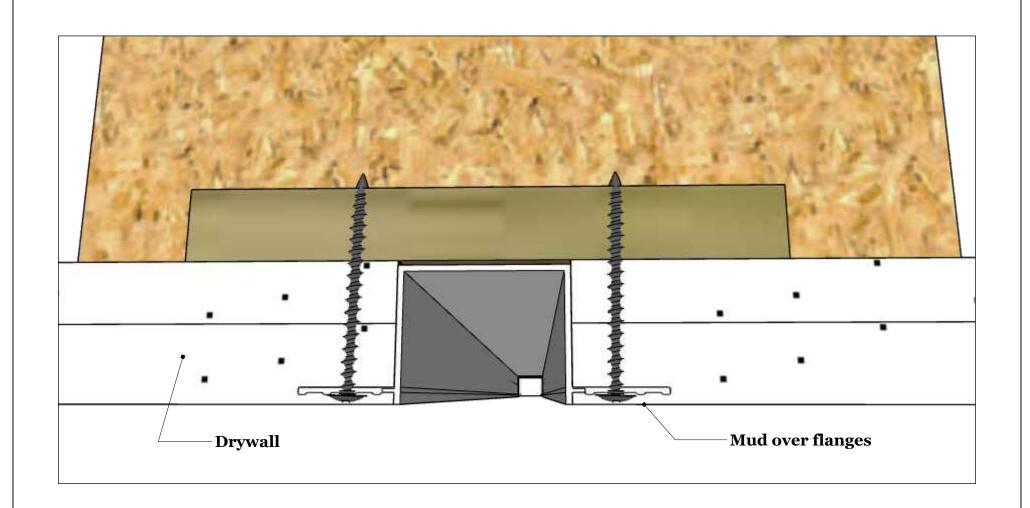

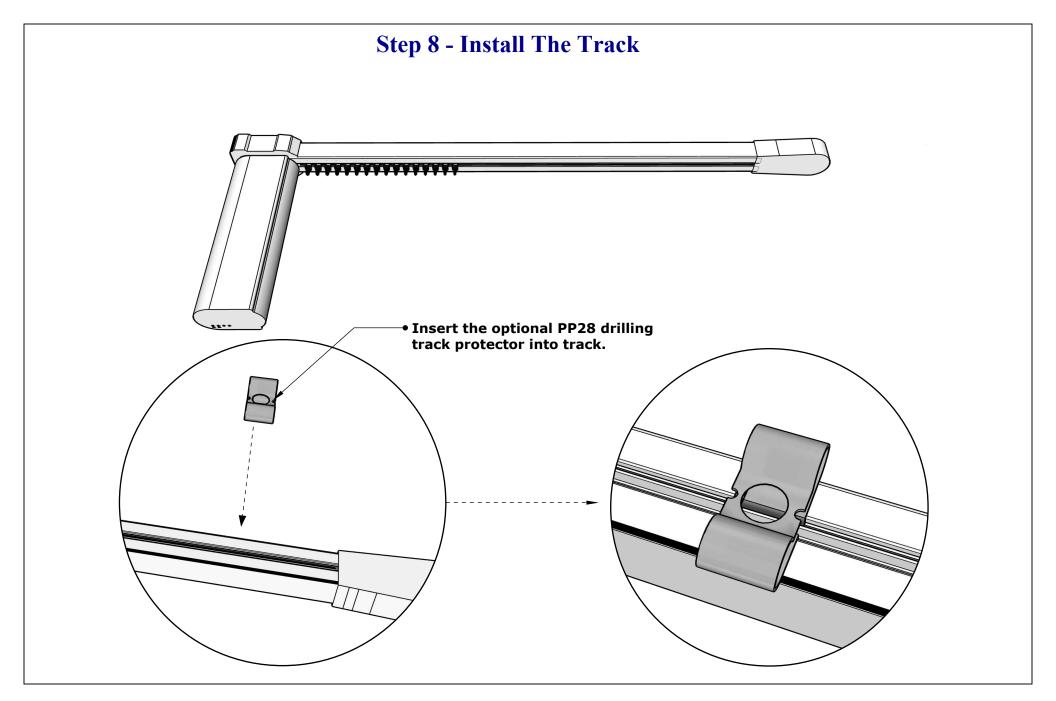

## **Step 6A - Test the Seams** Slide the spacing tool over seams to ensure a smooth transition. **Optional Spacing Tool**

## **Step 7 - Complete The Finish**

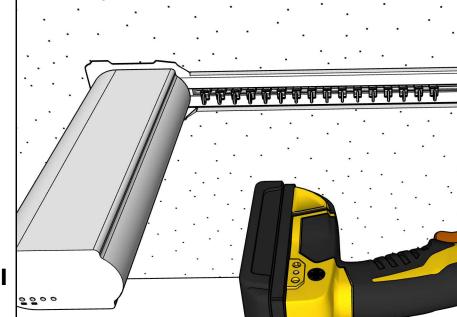

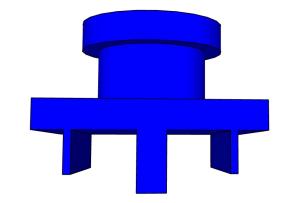

## **Step 9 - Install The Track**

**Insert optional Track Centering Tool** • ¬

Install screw anchors.

Note that the screw heads
will go through the holes pre-drilled
in the track and catch the bracket. •

**Optional Centering Tool** 

Note: If your system will be wall to wall, have an inside corner, or be a tandem track, and you have not purchased the pre-configured specialty ends for your application, the mud lip will need to be trimmed flush to the cavity to allow the drapery system to reach the extents.
